## 概覽 Overview

國際質量基礎建設網絡與世界銀行最近通過對質量基礎建設的新定義為：「這是一個由公營和私營機構組成，結合支援和提升產品，服務和工序的質量，安全和環境績效的政策，以及相關法律，規管框架及實務措施的體系。」此體系以計量學、標準化、認可服務、合格評定活動和市場監測為依據。質量基礎建設是促進經濟可持續增長、保護環境和維護社會福祉的重要平台，不僅能支持本土市場，其國際認可性亦對進軍外國市場發揮關鍵作用。

是次論壇響應世界計量日、世界認可日和世界標準日而舉辦，旨在介紹計量學、認可服務和標準在支援質量基礎建設方面的重要作用。今年，世界計量日、世界認可日及世界標準日的主題分別是：

### 世界計量日 — 國際單位制 — 根本性飛躍

國際單位制已於 2019 年 5 月 20 日正式修訂。新修訂的國際單位制建立在與物理定律直接關聯的一系列定義之上，其優勢是可以隨着測量科學與技術的新發展而進一步改進，以滿足未來使用者的長遠需求。

### 世界認可日 — 認可服務：為供應鏈增值

供應鏈是為消費者、企業和公營機構提供產品及服務的重要一環。認可服務連同其他質量基礎建設元素被廣泛應用於提升供應鏈價值，有助增強大眾對成品、服務以至其推出市場的途徑和使用方法的信心。

### 世界標準日 — 視頻標準通行全球

視像是現今流行的表達媒介。相關科技的發展革新了娛樂模式，連繫全球羣眾，令通訊體驗變得豐富多樣，亦促使醫療和教育取得重大進步。今年的世界標準日肯定了國際標準在滿足全球對視像質素及轉移性的追求所作的貢獻。

The International Network on Quality Infrastructure and the World Bank recently agreed on a new definition of the Quality Infrastructure (QI): 'The system comprising the organisations (public and private) together with the policies, relevant legal and regulatory framework, and practices needed to support and enhance the quality, safety and environmental soundness of goods, services and processes.' This system relies on metrology, standardisation, accreditation, conformity assessment and market surveillance. The QI is a crucial platform for promoting sustainable economic growth, as well as for maintaining environmental and social wellbeing. It does not only support domestic markets, but its international recognition is also essential for accessing foreign markets.

This forum, organised in celebration of the World Metrology Day (WMD), World Accreditation Day (WAD) and World Standards Day (WSD), will introduce the pivotal roles of metrology, accreditation and standards in supporting the QI. The themes of the three World Days this year are:

### WMD – The International System of Units - Fundamentally Better

The International System of Units (the SI) has officially been revised on 20 May 2019. The SI is now based on a set of definitions each linked to the laws of physics, which has the advantage of being able to embrace further improvements in measurement science and technology to meet the needs of future users for many years to come.

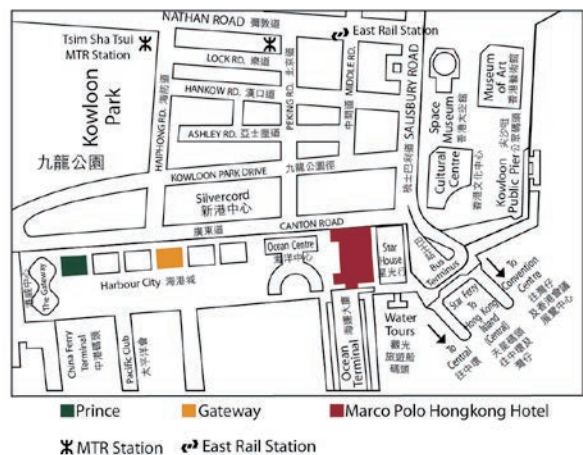

### WAD – Accreditation: Adding Value to Supply Chains

Supply chains play a vital role in delivering products and services for consumers, business and the public sector. Accreditation and other quality infrastructure elements together provide widely accepted tools that help deliver value to the supply chain. These tools enable confidence in both final products and services, and the manner in which they are placed on the market and used.

### WSD – Video Standards Create a Global Stage

Video is the modern medium of expression. Advances in its technology have revolutionised entertainment, connected people across the world, enriched communications experiences and enabled major improvements in medical care and education. This year's WSD recognises the contribution of international standards in meeting the global demand for better video quality and transferability.
