樓宇檢驗的最新技術與發展 網上研討會

Webinar on Latest Technology and Development
in Building Inspection

With the ageing of buildings in Hong Kong, building inspection and diagnostic testing have become crucial to access building conditions for proper follow up actions such as maintenance, refurbishment, and demolition. In recent years, new technologies have been adopted in various aspects of building inspection to enhance its effectiveness and quality. This webinar aims to share with participants the experience and insights in using latest technology (e.g. artificial intelligence, drones, infra-red thermography, etc.) in building inspection. You are cordially invited to participate in the event.

面對香港樓宇老化，樓宇診斷及檢測尤其重要。我們可以透過檢測了解樓宇狀況，從而訂定下一步方案例如維修、翻新，甚至拆卸。近年，樓宇檢測的不同環節都有應用到先進技術以提高效率和質素，是次網上研討會旨在分享在樓宇檢測中運用最新技術（例如人工智能、無人機、紅外線熱影像等）的經驗和心得。現誠邀你參與這項活動。
